
**Montana High School Dropout Rates
by Racial/Ethnic Origin
for the 2000-01 School Year**

**Linda McCulloch, Superintendent
Office of Public Instruction**

Calculating the Dropout Rate

Dropout rates can be calculated and reported in three different ways: event rates (snapshot of those who drop out in a single year), status rates (proportion of population who have not completed school and are not enrolled), and cohort rates (a more comprehensive picture which follows a sample group of students over time and generalizes their rate to a larger group). The collection method used in this report is an event rate adapted from the NCES at the U.S. Department of Education and is consistent with the requirements of the NCES Common Core of Data (CCD) reporting.

Who is a Dropout?

A dropout is an individual who:

- Was enrolled in school on the date of the previous year October enrollment count or at sometime during the previous school year and was not enrolled on the date of the current school year October count; or
- Was not enrolled at the beginning of the previous school year but was expected to enroll and did not reenroll during the year (“no show”) and was not enrolled on the date of the current school year October count; and
- Has not graduated from high school or completed a state- or district-approved high school educational program; and
- Has not transferred to another school, been temporarily absent due to a school-recognized illness or suspension, or died. (OPI, 2002)

How is a Dropout Rate Calculated?

The Montana School Accreditation Standards (10.55.603, ARM) require schools to do follow-up studies of graduates and students no longer in attendance, therefore, dropout data is collected from all public and accredited (by the Montana Board of Public Education) nonpublic schools. Dropout data is collected for grades 7 through 12 by gender and racial/ethnic categories. Dropout rates are calculated by dividing the number of dropouts as defined above by the October enrollment total, as reflected in the first bullet above. Disaggregated rates can be obtained by calculating the male/female dropout rates, and the rates by race/ethnicity to determine if some groups of students are more likely to drop out. The following report provides dropout rates by county, school, and racial/ethnic origin for all public and accredited nonpublic high schools.
